

I find it offensive that you are reviewing and may ammend NJ "Do Not Call" laws. It is oppresive that you actually decide how one should live. If overturned or altered, I believe you will have revealed your true interest—one that disregards people and their personal preferences even in their own dwelling. It would shame the FCC and be a sad day if you affect something that stemmed from a political-promise and actually works for everyone with impartiality. As you well know, this law precludes tele-scammers. Are you more interested in their rights? Maybe the federal law should be as stringent as ours and follow our lead. Please pick another battle that will be of greater benefit the public.
